Production process

1. Coal crusher machine

After

2. Wheel mixer and double shaft mixer

3. Honeycomb coal briquette machine

4. Honeycomb coal dryer machine

5. Honeycomb coal packing machine

If raw materials are coal cinder, they need to be crushed by coal crushing machine. After crushing, the coal powder is conveyed by air to the automatic weighing machine to add adhesives and mix in the wheel mixer. Then it is transferred to our honeycomb coal briquette machine for compaction and shaping. After shaping, our box dryer can dry the excess moisture in the material to make it burn more fully.
