Products

Honeycomb coal is an important heating supplies in rural daily life, in order to ensure that coal can be fully utilized to achieve better combustion effect, our Lantian Machinery Technical Team has developed energy-saving **honeycomb coal briquette press machine**, our **honeycomb coal briquette machine price** is just, quality is high, operation is simple, it is very loved in many countries.

Working principle

Coal is an indispensable raw material for industrial use. After pretreatment, our honeycomb coal briquette machine can briquette coal as honeycomb shape, machines mainly consists of main machine, input hopper, gear box, mould and output conveyor belt, coal powder will be transferred to input hopper, and they pressed

Machine Characteristics

1. The fuselage and all parts of honeycomb coal briquette press machine are made of high quality and high hardness metal materials, which are not easily damaged and easy to maintain.
2. The shape of the die can be customized, with a diameter of 30-260 mm and a height of 50 mm.
3. Our honeycomb coal briquette machine is automated, it can save customers' time and improve work efficiency.

Production process

1. Coal crusher machine

After

2. Wheel mixer and double shaft mixer

3. Honeycomb coal briquette press machine

4. Honeycomb coal dryer machine

5. Honeycomb coal packing machine

Our honeycomb coal briquette press machine is popular and received widely praise in many countries, before briquetting, coal need passing by series processing.

1. Before briquetting, coal need crush into finer coal powder by coal crusher machine,
2. And coal powder need add adhesive in automatic weighing system and stirring evenly in binder mixer,
3. Mixed coal powder will be transferred to honeycomb coal briquette machine for better briquetting, finished products have hardness and good burning effect,
4. Finished products can drying out excess water by our honeycomb coal dryer machine, to make them easy to store,
5. Dried products can use our honeycomb coal packaging machine for packaging or better storage.
